

THE VESARO x AUTOMOBILI LAMBORGHINI SIMULATOR

INTRODUCTION

Step into the future of ultra-premium driving simulation, a groundbreaking collaboration between cutting-edge simulator brand Vesaro and Automobili Lamborghini.

Experience the perfect fusion of Italian design and state-of-the-art engineering built for the ultimate thrill at your fingertips.

THE LAMBORGHINI EXPERIENCE

From the roar of the engine to the unmistakable design language, every Lamborghini embodies a legacy of performance, passion, and precision. With the Vesaro x Automobili Lamborghini Simulators, that spirit is brought into a new dimension. An immersive experience that captures the thrill of driving a Lamborghini in its purest form. Combining iconic Italian craftsmanship with cutting-edge simulation technology, they are more than just simulators, they are the essence of Lamborghini, reimagined for your personal driving space.

PUSH TO START

We have taken realism to the next level by integrating an authentic Lamborghini start button directly into its control system. This genuine push-to-start ignition switch, has been seamlessly adapted to serve a new purpose: powering on the high-performance PC that drives the simulator.

With a flip of the iconic red cover and a press of the start button, users ignite not only their simulated engines, but the entire immersive racing experience. This fusion of luxury automotive design and cutting-edge simulation technology delivers a tactile thrill that mirrors the excitement of starting a real Lamborghini.

REVUELTO WHEEL

An authentic Lamborghini Revuelto steering wheel and paddle shifters brings an unmatched level of realism to your racing experience. This is not a replica or imitation; it's the exact same wheel as found in the revolutionary Lamborghini Revuelto.

Powered by a 17Nm wheelbase, engineered for unmatched precision and ultra-smooth torque, it captures every nuance of the road and driving dynamics.

PEDALS

Fully adjustable in position, angle, and tension, the pedal system supports fine-tuned ergonomics to match the feel of a real-world supercar. Whether you're modulating throttle input or applying trail braking into a corner, every movement is captured with precision. Components inspired by the aggressive, angular design language of Lamborghini.

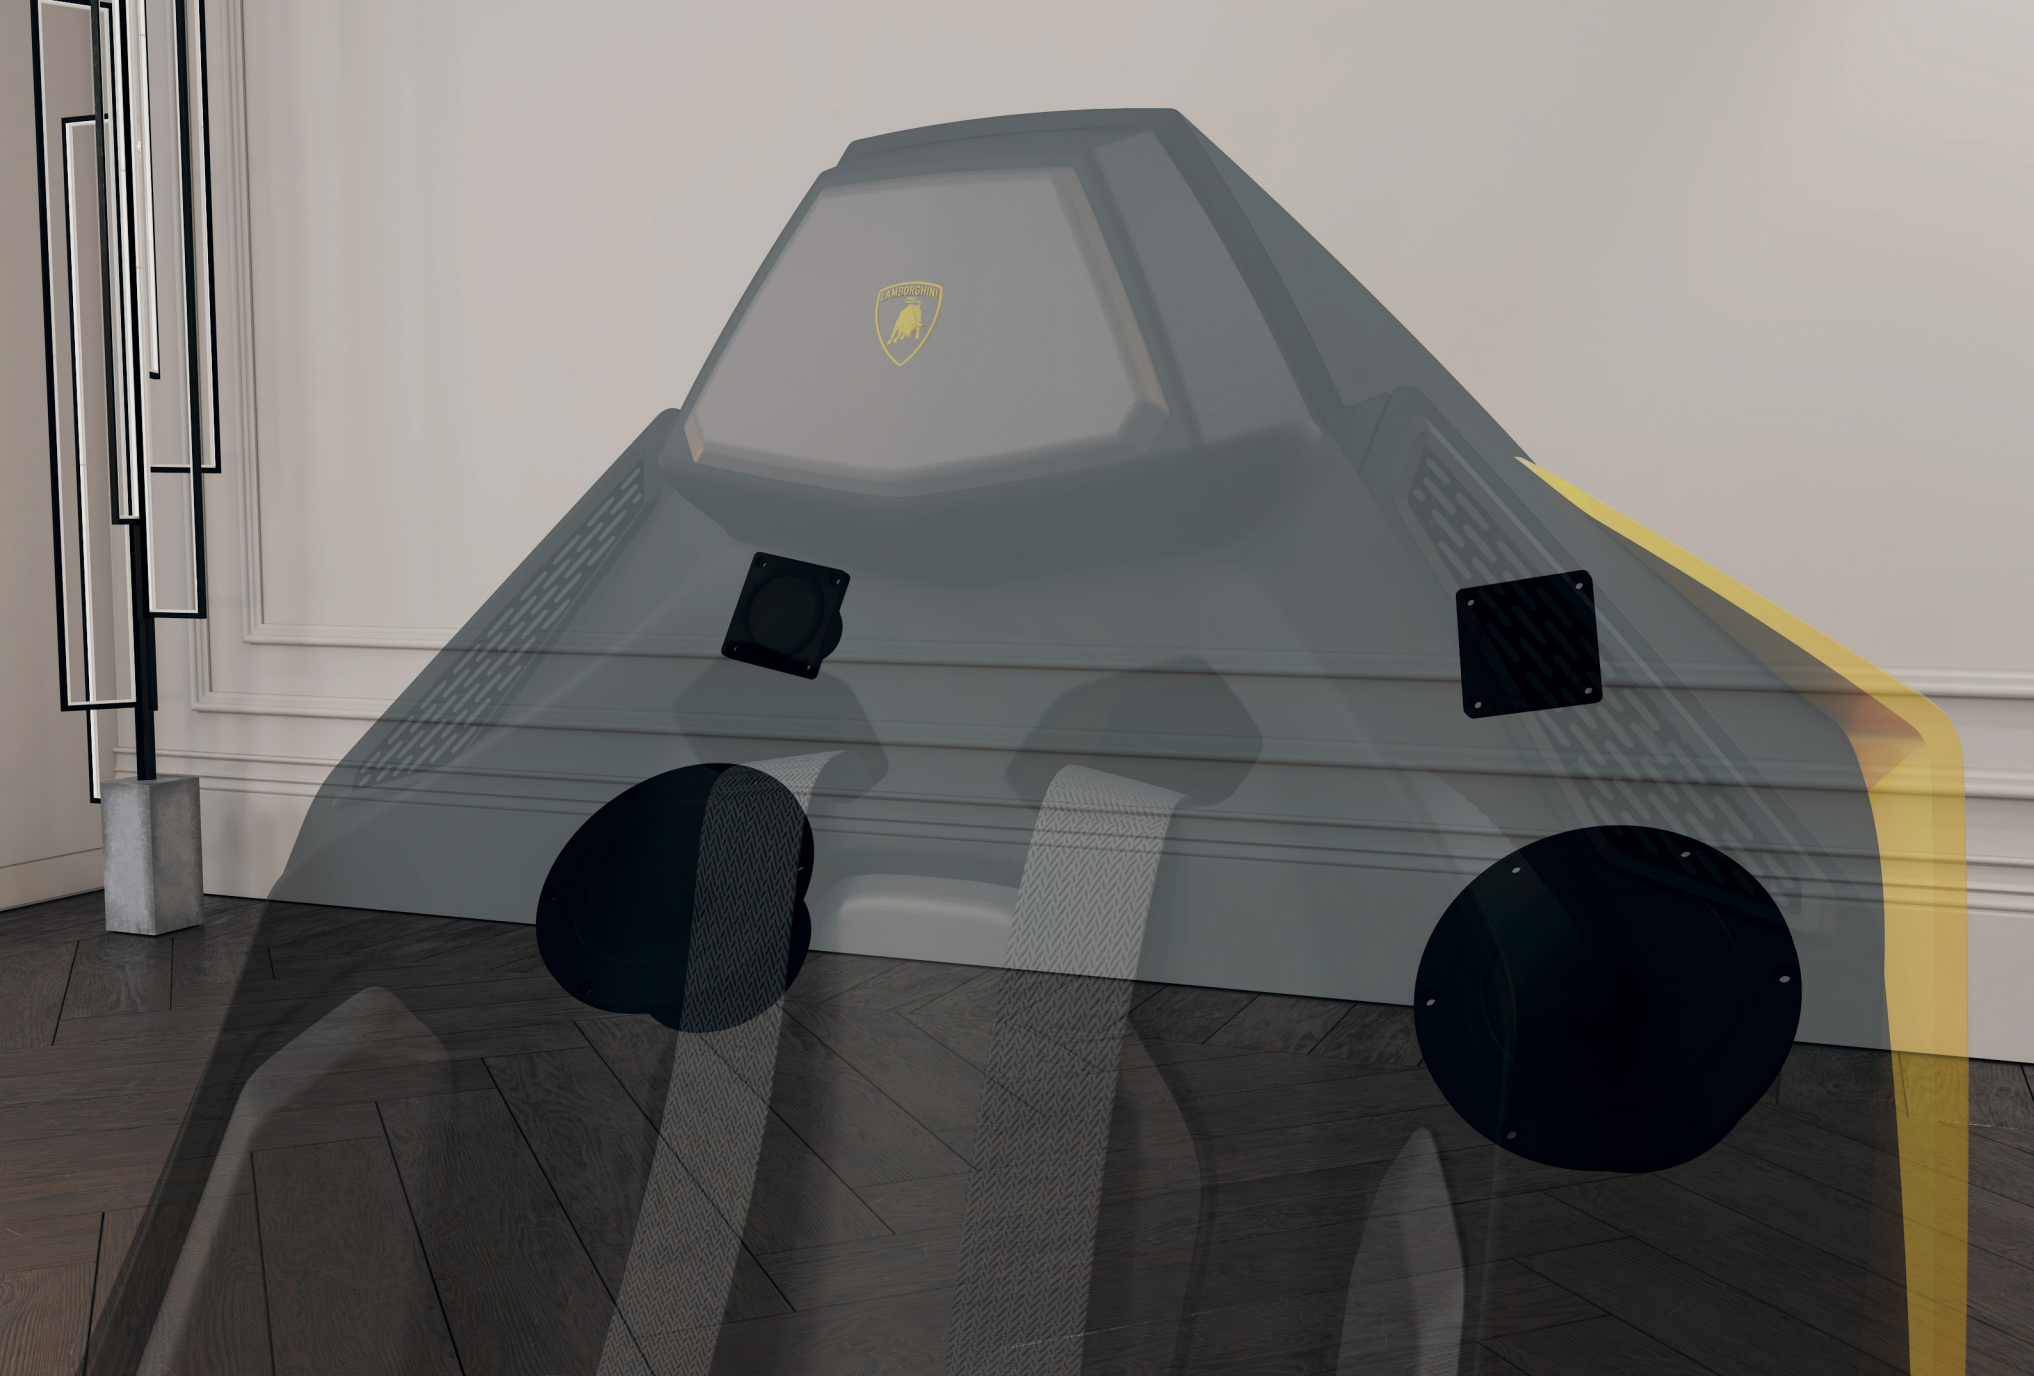

These unique pedal faces not only provide a striking visual match to Lamborghini's cockpit styling, but also offer enhanced grip and tactile feedback, contributing to a more immersive and authentic driving experience.

MOTION

The simulators are powered by the worlds only FIA Approved Haptic motion technology system, designed to capture the thrill of driving a Lamborghini. Delivering precise, lifelike movement, so every brake, corner, and burst of acceleration feels unmistakably real. The motion is seamlessly synchronised to the on-screen action, immersing drivers in the authentic sensation of control and performance.

Elevate your experience further with the Estremo simulator model; An enhanced motion platform introducing traction loss and an expanded range of movement.

8.1 AUDIO SYSTEM

Experience racing simulation on a cinematic scale with the Vesaro 8.1 integrated audio system, featuring a low profile subwoofer, four mid-range speakers, and four precision tweeters. Every component is seamlessly built into the simulator's bodywork, preserving its sleek design while surrounding the driver with rich, detailed sound. The result is a premium audio experience that delivers total immersion to match the power and intensity of Lamborghini.

ARC DISPLAY

The simulators are equipped with either single or triple ultra curved 4K displays, designed with a 1000R sweeping curve that surrounds the driver in the action. Its immersive shape and clarity create a breathtaking field of view, pulling you deeper into every corner, straight, and overtaking manoeuvre. The result is an experience that combines cutting-edge display technology with Lamborghini's unmistakable sense of performance and style.

PC

At the heart of the simulator, the computer. Built directly into the simulator's body, delivering a clean and unified look that's both functional and beautiful. Under the hood this beating heart delivers high-end gaming graphics to run even the most demanding simulations at 4K resolution, with ultra-high refresh rates.

This is next-gen power, streamlined and performance driven.

SIMULATION

The simulator is powered by a professional-grade software suite designed to deliver uncompromising realism. Featuring advanced physics, precisely recreated track environments, and a performance roster of Lamborghini vehicles, it provides the foundation for both competitive racing and professional driver training. Every detail, from handling dynamics to visual fidelity, is crafted to immerse the driver in the authentic Lamborghini experience.

Tailored software options are available upon request.*

COLOUR RANGE

Every simulator is finished with a choice of bold, high-quality colour options to match your style. Whether you choose Orange, Blue, Green, or Yellow, each finish is applied with meticulous attention to detail, ensuring a vibrant, durable look that reflects the performance and prestige of the Automobili Lamborghini colour range.

PRESTIGIO EDITION

Official Lamborghini simulator featuring an iconic body designed in collaboration with Centro Stile Lamborghini, featuring:

- Genuine Lamborghini Revuelto Wheel Rim & Shifters
- Integrated Lamborghini style seat with embroidered headrest
- Genuine Lamborghini start button
- Lamborghini shield & script emblems
- Electronic wheel & pedal distance adjustment
- Lamborghini-Styled Pedals
- Single 55" Arc Display
- 8.1 Surround Sound
- Enhanced Haptic motion, traction loss system and enhanced tactile feedback system
- Sim Control Centre, Bespoke PC

Worldwide installation available, find out more at www.vesaro.com/automobili-lamborghini

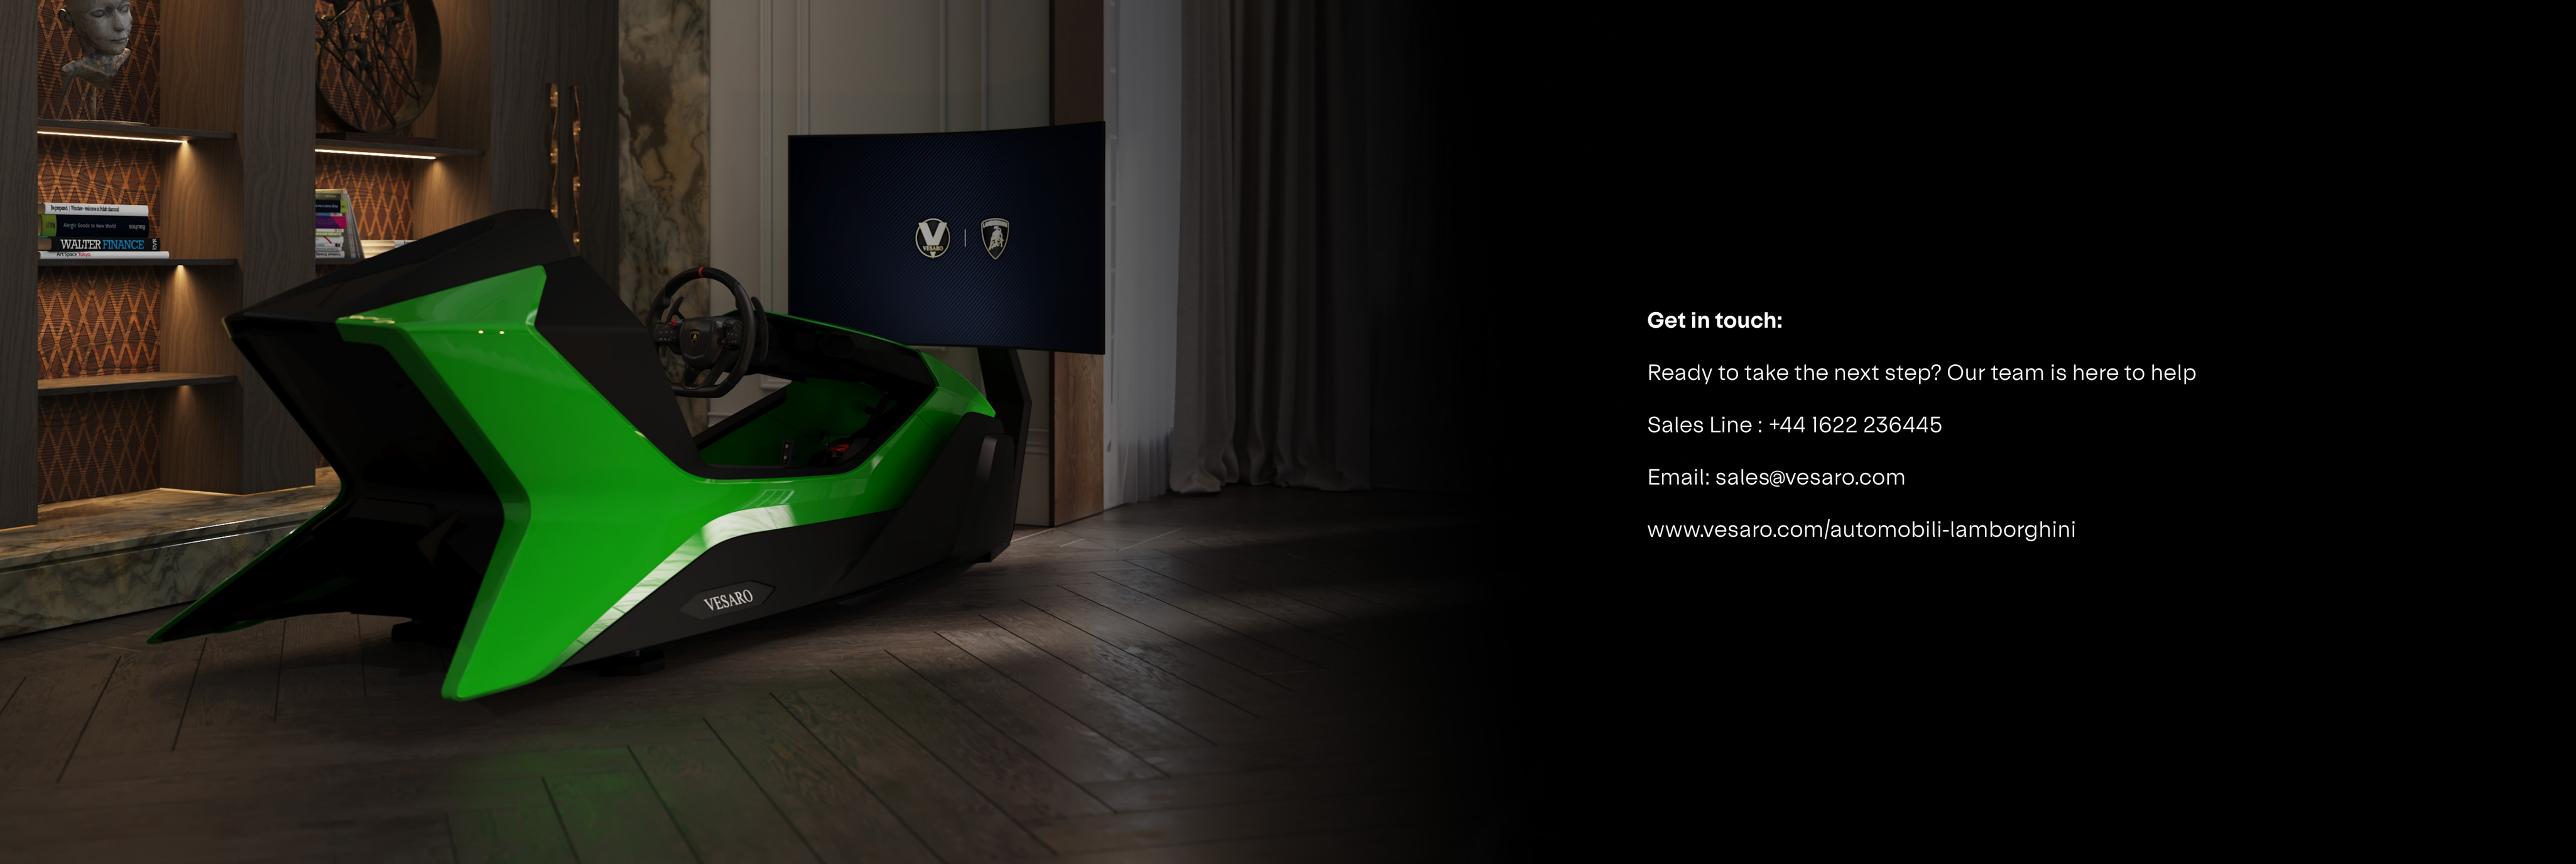

ESTREMO EDITION

Official Lamborghini simulator featuring an iconic body designed in collaboration with Centro Stile Lamborghini, featuring:

- Genuine Lamborghini Revuelto Wheel Rim & Shifters
- Integrated Lamborghini style seat with embroidered headrest
- Genuine Lamborghini start button
- Lamborghini shield & script emblems
- Electronic wheel & pedal distance adjustment
- Lamborghini-Styled Pedals
- Triple 55" Arc Display
- 8.1 Surround Sound
- Enhanced Haptic motion, traction loss system and enhanced tactile feedback system
- Sim Control Centre, Enhanced Bespoke PC

Worldwide installation available, find out more at www.vesaro.com/automobili-lamborghini
